

Guide to Property Address Identifiers

In order to make certain that emergency personnel can quickly and easily identify your location, the Saint Anthony Village Zoning Code requires that all properties display the legal address numbers, in a manner prescribed within the code. This document will identify the expectations and serve as a how-to guide for Saint Anthony Village residents and business owners.

Section 97.10 in City Code covers address numbers required on buildings. Although it is a property owner's responsibility to adhere to all aspects of the code, primary requirements, along with examples, are as follows:

- Each owner of a 1- or 2-family dwelling in the city must post the correct street or avenue number of the building in a conspicuous place both on the front and rear of the building in accordance with this section.
- House numbers must be in Arabic numerals, and of color contrasting to the building. See examples below.

Good **size** and **contrast** for identifiability on structure

Problematic **size** and **contrast** for identifiability on structure

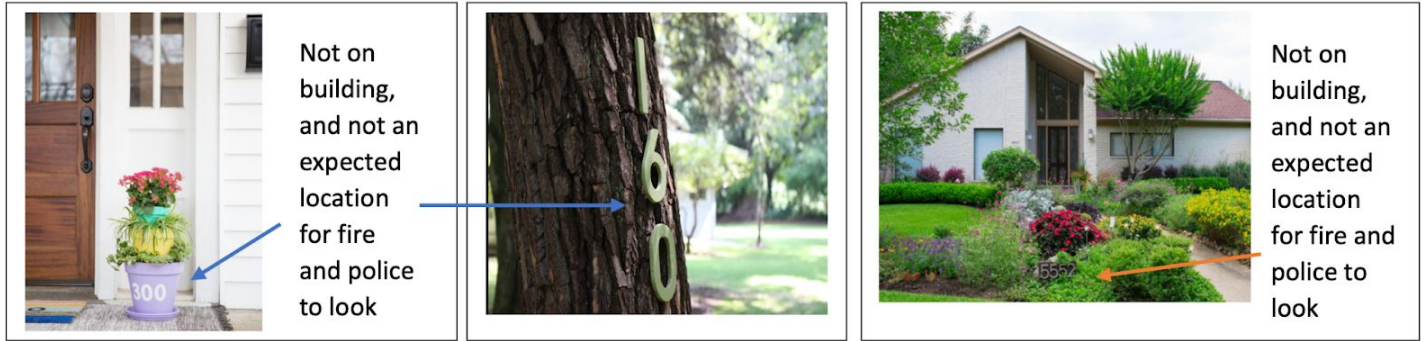

- Each numeral may be **no less** than 4 inches (102 mm) in height and **no less** than 3/4 inch (12.7 mm) in stroke width.
- Front numerals must be posted **on the building surface** nearest the street or avenue nearest the front of the building. These numerals **must be at a height and position** so that the numerals can be easily read by a person of normal vision while seated in an emergency vehicle located in the street.

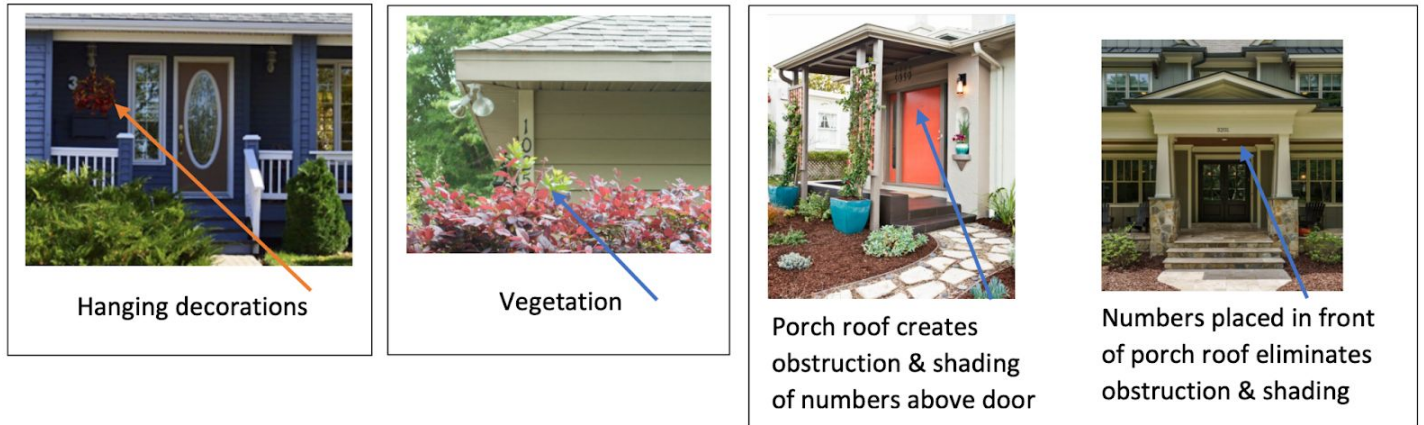

Guide to Property Address Identifiers

See examples below:

- Rear building posting will not be required unless an alley or other public access exists to the rear of the lot or parcel on which the building is located.
- Rear numerals must be posted on the building surface nearest the alley or other rear public access. The numerals must be at a height and position such that the numerals can be easily read by a person of normal vision while seated in an emergency vehicle located in the alley or other rear access.

Be aware of potential obstructions, see examples below:

Minimum Number Size / Distance Guide

70' or less from street	4" numbers
71' to 110' from street	5" numbers
111' to 150' from street	6" numbers
Greater than 150'	7" numbers
